

Transportation Technology

In today's industry technology is vital, as such MaxPro understands that technology cannot only allow a company to run smoothly but also help it grow. Therefore, MaxPro has strived to offer its clients various advanced software's including:

TransPlus

MaxPro has exclusively collaborated with TransPlus to allow a state of the art fleet management software to be purchased by client companies at a fraction of the cost. The software eases operations and management of the business through its incredible features. Some of the core product features include:

-
- Load Tracking
- Load Planning
- Database Management
- Dispatching
- Trip Manifest
- Bill Of Lading
- Outside Carrier Contracting
- Customer Billing,
- Approved IFTA Tax Tables
- Financial Analysis

- Increases Dispatch Productivity
- Provides Fuel Tax Reporting
- Increases Truck/Trailer Profitability
- Provides Trip Revenues & Expenses

SWISS Text

MaxPro has also teamed up with the prestigious technology company IIMSWISS. Together MaxPro and IIMSWISS have worked on and are continuing to work on different software's and integrations to allow trucking companies to run efficiently. The two companies together have recently released SMS technology for trucking companies in which dispatchers can directly message drivers through TransPlus, an only solution which provides two way messaging.

Satellite Tracking System

MaxPro Management also provides an exceptional deal with the purchase of fuel cards. In order to ensure the safety of the trucks of client companies, a state of the art satellite tracking system is offered. The cost of the tracking system, outside of initial hardware and installation cost, is subsidised with the number of fuel cards purchased.
