

Transportation Claim Processing

On average, within the trucking industry, 60% of the insurance premium goes towards claims. For the most part carriers are unaware of their right to assign their own adjuster, due to which they end up incurring a loss. Under the MaxPro umbrella, there are close to 1500 trucks that are ever growing. Even with the current numbers, currently \$11 million claims are handled. As such, even if 1% of savings is done, the carrier ends up saving \$1,000,000. Thus, MaxPro is bringing claims adjustment in house and in order to better serve clients and grow their savings and to ensure the best results the Maxpro has hired experience adjusters from the industry so Maxpro is becoming more and more robust to bring more savings to its clients .
